

CLARIDGE

ONE-STOP ENGINEERING

CLARIDGE ONE – STOP

is an independent company with over 30 years experience supplying a global market.

Based in Reading, England. We are 25 miles west of London's Heathrow Airport.

Over 20% of our sales are overseas, we supply direct to:

**America • Dubai • France • Germany • Australia
Holland • Hungary • Czech Republic • Singapore**

Claridge has developed over the years to meet a very fast changing market. Our expansion and success has been structured on 6 key areas combining to offer a ONE – STOP manufacturing facility, under one roof.

- **STAMPINGS & PRECISION METAL PRESSINGS**
- **SPRINGS & WIREFORMS**
- **COMPLETE ASSEMBLIES**
- **MANUFACTURE UNDER LICENCE**
- **FABRICATION**
- **POWDER COATING**

STAMPINGS & PRECISION METAL PRESSINGS

We operate one of the largest Metal Stamping production facilities in the South of England with power presses ranging from 6 – 100 tonne. Our presses are equipped with automatic feeding for coils & strip materials up to 5mm thick, using progressive, compound and single op tooling.

Our quick change set up allows us to be competitive on small batch work but is equally suited to high volume.

In-house toolroom ensures that tool maintenance is quick and efficient and keeps tool down time to minimum.

SPRINGS & WIREFORMS

Specialist manufacturer and supplier of precision flat and coil springs.

Our technicians can help design the perfect spring to suit your requirements.

Compression Springs • Torsion Springs • Tension Springs • Flat Spring Clips • Wireforms

Our modern plant produces high quality, high volume springs in a variety of materials. We have in-house heat treatment and grinding facilities.

COMPLETE ASSEMBLIES

The natural progression from manufacturing individual parts is to offer an assembly service. This has turned out to be a very efficient method of supplying our customers.

We have been able to reduce the number of orders that are processed and assembled parts can go straight to the production line.

Assembled items reduce the storage space required and eliminates any in-balances in the stores

FABRICATION

We undertake fabrications of both pressed parts and those formed through other processes, such as box section, tube and flat bar, as well as free issued materials.

Our welding facilities include MIG, TIG and spot welding.

POWDER COATING

Alongside our fabrication department we have installed a powder coating plant. This enables us to keep total control of our manufactured items. There is more of a demand for fabricated items to be finished in this very durable process.

MANUFACTURE UNDER LICENCE

Outsourcing production allows growing companies to free up expensive floor space allowing for the development of new projects or it can be used for just reducing operating cost

We will house your plant and equipment in a dedicated area and supply a skilled workforce.

The benefits are:

Reduce Staff wages • Free Up Expensive Floor Space • Keeping Control of Your product

Environmental Benefits:

Reduced Energy Costs • Saving on Transport

***We offer a rapid prototype service
